Primers

Product Name	Product Description	Product Class	Package	QTY per Pallet	Product Color
 GYPSOPLAST  TS 13744	Acrylic polymer-based, single-component, water-based primer used to increase adherence before gypsum and plaster applications on exposed concrete surfaces	Class I	5/12 Kg PP Bucket	60 pcs.	Pink
 PRIMER A  TS 13744	Acrylic copolymer-based, single-component primer that balances surface absorbency by increasing adherence between the subfloor and the application material to be applied on	Class II	25 Kg PP Bucket	60 pcs.	Blue
 PRIMER ULTRA  TS 13744	Acrylic copolymer-based, single-component primer with filling agent that increases the adherence of the surface and balances its absorbency, especially for ceramic applications on ceramic	Class I	20 Kg PP Bucket	60 pcs.	Pink

Tile Adhesives

 1C  EN 12004-1	Acrylic emulsion based, high performance, reduced-slip, extended working time, ready-to-use, D2TE class, paste-type ceramic tile adhesive	D2TE	5/20 Kg PP Bucket	60 pcs.	White
 CA 50  TS EN 12004-1:2017	Cement - based, polymer - added, C1 class ceramic tile adhesive mortar designed to be used indoors and on horizontal surfaces	C1	25 kg Kraft Bag	60 pcs.	Grey White
 CA 52  EN 13888-1	Cement-based, polymer-added, reduced-slip, C1T class ceramic tile adhesive mortar	C1T	25 kg Kraft Bag	60 pcs.	Grey White
 CA 54  EN 13888-1	Cement-based, polymer-added, reduced-slip, C1TE class ceramic tile adhesive mortar with extended open time feature	C1TE	25 kg Kraft Bag	60 pcs.	Grey White
 CA 60  EN 13888-1	Cement-based, polymer-added, high-strength, C2 class ceramic tile adhesive mortar, developed with additional features	C2	25 kg Kraft Bag	60 pcs.	Grey White

Tile Adhesives

Product Name	Product Description	Product Class	Package	QTY per Pallet	Product Color
 CA 60 FLEX  EN 12004-1	Cement-based, polymer-added, high-strength, reduced-slip, C2T class ceramic tile adhesive mortar, developed with additional features.	C2T	25 kg Kraft Bag	60 pcs.	Grey White
 POWER FLEX  EN 12004-1	Cement-based, polymer-added, high strength, non-slip, C2TE class ceramic tile adhesive mortar with extended open time, developed with additional features.	C2TE	25 kg Kraft Bag	60 pcs.	Grey White
 SUPER FLEX  EN 12004-1	Cement-based, polymer-added, high strength, non-slip, C2TES1 class flexible ceramic tile adhesive mortar with extended open time, developed with additional features.	C2TES1	25 kg Kraft Bag	60 pcs.	Grey White
 GA GRANITEX  EN 12004-1	Cement-based, polymer-added, high strength, non-slip, C2TES2 class flexible ceramic tile adhesive mortar with extended open time, developed with additional features.	C2TES2	25 kg Kraft Bag	60 pcs.	Grey White
 GA GRANITEX RAPID  EN 12004-1	Cement-based, polymer-added, high-strength, non-slip, fast-curing, C2FT class ceramic tile adhesive mortar developed with additional features.	C2FT	25 kg Kraft Bag	60 pcs.	Grey
 NS  EN 12004-1					Grey White

Tile Grouting

 JOINT  EN 13888-1	Cement-based, silicone-added, high-performance, CG1 class tile grouting mortar, developed with special polymer additives.	CG1	20 kg Kraft Bag	60 pcs.	Grey White Bahama Beige Caramel Balibraun Jasmine Anemone Black
 FLEX JOINT  EN 13888-1	Cement-based, polymer and silicone additive, high-performance, CG2WA class, flexible tile grouting mortar, suitable for 1 - 6 mm joints.	CG2WA	20 kg Kraft Bag	60 pcs.	Grey White Bahama Beige Caramel Balibraun Jasmine Anemone Black

Tile Grouting

Product Name	Product Description	Product Class	Package	QTY per Pallet	Product Color
 ULTRA JOINT  EN 13888-1	Cement-based, silicone-added, high-performance, CG2WA class, flexible tile grouting mortar, suitable for 2 - 20 mm joints.	CG2WA	20 kg Kraft Bag	60 pcs.	Grey White Bahama Beige Caramel Balibraun Jasmine Anemone Black
 POOL JOINT  EN 13888-1	Cement-based, silicone-added, high performance, CG2A class, flexible tile grouting mortar, resistant to pool chemicals, suitable for 1 - 6 mm joints	CG2WA	20 kg Kraft Bag	60 pcs.	Grey White Bahama Beige Caramel Balibraun Jasmine Anemone Black
 EPO JOINT  EN 13888-1	Epoxy-based, two-component, solvent-free, chemical-resistant, tile adhesive and grouting mortar	RG2	5+2 Set Metal Bucket Set	48 pcs.	Grey White

Repair & Reinforcement Materials

 EPOXY 645  EN 1504-3	Epoxy-based, two-component, solvent-free, moisture-tolerant, thixotropic, R4 class, structural repair and bonding mortar.	R4	5 kg Metal Bucket Set	48 pcs.	Grey
 EPOXY 720  EN 1504-3	Epoxy-based, two-component, solvent-free, flowable, R4 class adhesive used in the adherence of old concrete to new concrete or in bonding different types of materials to each other.	R4	5 kg Metal Bucket Set	48 pcs.	Grey
 GROUT 255  EN 13813	Cement-based, high-strength, highly flowable, R4 class, shrinkage compensated grout (10-45 mm)	C50-F6	25 kg Kraft Bag	60 pcs.	Grey
 GROUT 265  EN 13813	Cement-based, high-strength, highly flowable, R4 class, shrinkage compensated grout (10-110 mm).	C50-F6	25 kg Kraft Bag	60 pcs.	Grey

Repair & Reinforcement Materials

Product Name	Product Description	Product Class	Package	QTY per Pallet	Product Color
 MANHOLE LEVELLER ML50  TS EN 1504-3:2008 TS EN 13813:2004	Cement-based, high-trength, fast setting, highly flowable, R4 class, shrinkage compensated grout.	R4-C50-F7	25 kg Kraft Bag	60 pcs.	Grey
 RM 400  EN 1504-3	Cement-based, one-component, polymer-modified, high-performance, R1 class, fine-grained repair and leveling mortar (1 - 10 mm).	R1	25 kg Kraft Bag	60 pcs.	Grey
 RM 401  EN 1504-3	Cement-based, one-component, polymer-modified, high-performance, R1 class, coarse-grained repair and leveling mortar (5 - 20 mm).	R1	25 kg Kraft Bag	60 pcs.	Grey
 RM 405  EN 1504-3	Cement-based, one-component, polymer-modified, high-performance, R2 class, fine-grained repair and leveling mortar (2 - 20 mm).	R2	25 kg Kraft Bag	60 pcs.	Grey
 RM 406  EN 1504-3	Cement-based, one-component, polymer-modified, high-performance, R2 class, coarse-grained repair mortar (5 - 20 mm).	R2	25 kg Kraft Bag	60 pcs.	Grey
 RM 420  EN 1504-3	Cementitious, one-component, polymer-modified, high-performance, R3 class, fine-grained, thixotropic structural repair mortar (5-20 mm).	R3	25 kg Kraft Bag	60 pcs.	Grey
 RM 425  EN 1504-3	Cement-based, one-component, polymer-modified, high-performance, R3 class coarse-grained, thixotropic structural repair mortar (5-40 mm).	R3	25 kg Kraft Bag	60 pcs.	Grey
 RM S60  EN 1504-3	Cement-based, one-component, polymer-modified, high-performance, sulfate-resistant, R4 class, fine-grained, thixotropic structural repair mortar (5-20 mm).	R4	25 kg Kraft Bag	60 pcs.	Grey

Repair & Reinforcement Materials

Product Name	Product Description	Product Class	Package	QTY per Pallet	Product Color
 RM S70  EN 1504-3	Cement-based, one-component, polymer-modified, sulfate-resistant, high-performance, coarse-grained, thixotropic structural repair mortar (5-40 mm).	R4	25 kg Kraft Bag	60 pcs.	Grey

Flooring Materials

Product Name	Product Description	Product Class	Package	QTY per Pallet	Product Color
 100  TS EN 13813:2004	Cement-based, quartz aggregated, surface hardener that increases wear resistance against light and medium loads.	C50-F7	25 kg Kraft Bag	60 pcs.	<div>Naturel</div> <div>Grey</div> <div>Red</div> <div>Green</div>
 300  TS EN 13813:2004	Cement-based, corundum aggregated, surface hardener that increases wear resistance against medium and heavy loads.	C60-F8	25 kg Kraft Bag	60 pcs.	<div>Naturel</div> <div>Grey</div> <div>Red</div> <div>Green</div>
 SL 110  TS EN 13813:2004	Cement-based, ready-to-use, self-leveling floor screed that can be applied between 1 - 10 mm.	C30-F7	20 kg Kraft Bag	60 pcs.	Grey
 ESL  EN 1504-2	Epoxy-based, two-component, solvent-free, self-leveling floor coating material, resistant to mechanical and chemical effects.	PR. 5,1	24 kg Metal Bucket Set	24 pcs. + 48 pcs.	Ral Colors
 ETX  EN 1504-2	Epoxy-based, two-component, solvent-free, thixotropic floor coating material that provides textured surface finish.	PR. 5,1	24 kg Metal Bucket Set	24 pcs. + 48 pcs.	Ral Colors
 COAT 80  EN 1504-2	Epoxy resin based, two-component, solvent-free, paint and coating material developed especially to protect concrete and steel surfaces.	Pr. 1,3 / 5,1	5 kg Metal Bucket Set	48 pcs.	Ral Colors

Flooring Materials

Product Name	Product Description	Product Class	Package	QTY per Pallet	Product Color
 EPOXY PRIMER  EN 1504-2	Epoxy resin based, two-component, low-viscosity, solvent-free primer and impregnation material.	Pr. 1,3 /2,1	15 kg Metal Bucket Set	24+48 pcs.	Transparent
 EPOXY HP 101  EN 1504-2	Epoxy resin based, two-component, low-viscosity, solvent-free, moisture tolerated primer for damp surfaces.	Pr. 1,3 /2,1	15 kg Metal Bucket Set	24+48 pcs.	Transparent
 EPOXY OP 102  EN 1504-2	Epoxy resin based, two-component, low-viscosity, solvent-free, surface-tolerant primer.	Pr. 1,3 /2,1	15 kg Metal Bucket Set	24+48 pcs.	Transparent
 EPOXY FP 103  EN 1504-2	Epoxy resin based, two-component, low-viscosity, solvent-free, primer with filling agent.	Pr. 1,3 /2,1	15 kg Metal Bucket Set	24+48 pcs.	Transparent

Waterproofing Materials

Product Name	Product Description	Product Class	Package	QTY per Pallet	Product Color
 BITUMENT 1C  EN 15814	Polymer modified bitumen-Rubber based, single-component, waterproofing material.	CB2-R1 W1-C2A	18 kg Plastic Bucket	24 pcs.	Black
 BITUMENT 2C  EN 15814	Polymer modified bitumen-Rubber and Cement based, two-component, elastic, waterproofing material.	CB2-R1 W1-C2A	22+8 kg Plastic Bucket	27 pcs. + 27 pcs.	Black
 BITUMENT 1C PLUS  EN 15814	Polymer modified bitumen-Rubber based, single-component , waterborne, UV-resistant, waterproofing material.	CB2-R1 W1-C2A	18 kg Plastic Bucket	24 pcs.	Black

Waterproofing Materials						
Product Name	Product Description	Product Class	Package	QTY per Pallet	Product Color	
 BITUMENT 2C PLUS  EN 15814	Polymer modified bitumen-Rubber based, two-component, high elastic, UV resistant, coarse waterproofing material. It meets the requirements of EN 15814.	CB2-R1 W1-C2A	22+8 kg Plastic Bucket	27 pcs. + 27 pcs.	Black	
 BITUMENT PRIMER  EN 1504-2	Polymer modified bitumen based, single-component, waterborne, primer for waterproofing materials.	Pr. 1,2 (I)	18 kg Plastic Bucket	24 pcs.	Black	
 BITUMENT PU 1C  EN 14891	Bitumen-Polyurethane based, single-component, fast-curing, elastic, liquid applied waterproofing material.	RMPP02	20 kg Metal Bucket Set	24 pcs.	Black	
 BITUMENT PU 2C  EN 14891	Bitumen-Polyurethane based, two-component, fast curing, super elastic, waterproofing material.	RMPP02	20+20 Metal Bucket Set	27 pcs. + 27 pcs.	Black	
 MEGALASTIC PU 350  EN 14891	Polyurethane based, single-component, solventborne, ready-to-use, elastic waterproofing material, suitable for light pedestrian traffic.	RMPP02	20 kg Metal Bucket Set	24 pcs.	Grey White	
 MEGALASTIC PU 550 UV  EN 1504-2	Aliphatic polyurethane based, single-component, solventborne, UV resistant, ready-to-use, super elastic, waterproofing material, suitable for light pedestrian traffic.	RMPP02	20 kg Metal Bucket Set	24 pcs.	Grey White	
 MEGALASTIC PU PR  EN 1504-2	Polyurethane based, single-component, solventborne, low-viscosity, waterproofing primer.	Pr. 1,2 (I)	20 kg Metal Bucket Set	48 pcs.	Grey White	
 CRYSTAL  EN 1504-2	Cement-based, single-component, crystallized waterproofing material, suitable both for positively and negative way of waterproofing applications.	CMPP02	25 kg Kraft Bag	60 pcs.	Grey	

Waterproofing Materials						
Product Name	Product Description	Product Class	Package	QTY per Pallet	Product Color	
 FLEX 105 SET  EN 14891	Cement and Acrylic based, two-component, UV resistant, CMO1P class, fully elastic waterproofing material.	CMPP02	25 kg Kraft Bag + 8 kg Plastic Drum	60 pcs. + 60 pcs.	White	
 FLEX 106 SET  EN 14891	Cement and Acrylic based, two-component, CMO1P class, fully elastic waterproofing material.	CMPP02	20 kg Kraft Bag + 10 kg Plastic Drum	60 pcs. + 60 pcs.	Grey	
 FLEX 107 SET  EN 14891	Cement and Acrylic based, two-component, CMO1P class semi-elastic waterproofing material.	CMPP01	20 kg Kraft Bag + 5 kg Plastic Drum	60 pcs. + 60 pcs.	Grey	
 LIQUID  EN 14891	Elastomeric resin-based, two-component, UV resistant, ready-to-use, DMP01 class, super elastic waterproofing material.	DMP02	20 kg Plastic Bucket	60 pcs.	White Grey Red	
 NP SET  EN 14891	Cement and Acrylic based, dual component, capillary effect waterproofing material, suitable both for positive and negative way of waterproofing applications.	CMPP01	25 kg Kraft Bag + 2 kg Plastic Drum	60 pcs. + 60 pcs.	Grey	
 NP PLUS GRİ SET  TS EN 14891:2017	Cement and Acrylic based, two-component, fully elastic, capillary effect waterproofing material, suitable both for positive and negative way of waterproofing applications.	CMP01	25 kg Kraft Bag + 10 kg Plastic Drum	60 pcs. + 60 pcs.	Grey	
 SHOCK 10  TS EN 1504-3:2008	Cement-based, one-component, ready-to-use, ultra rapid setting (within 5-10 sec.) water plugging material, suitable for powder application without mixing with water.	R4	5 kg Plastic Bucket	60 pcs.	Grey	
 SHOCK 30  TS EN 1504-3:2008	Cement-based, one-component, ready-to-use, super rapid setting (within 30-60 sec.) water plugging material, suitable for powder application without mixing with water.	R4	5 kg Plastic Bucket	60 pcs.	Grey	

Waterproofing Materials

Product Name	Product Description	Product Class	Package	QTY per Pallet	Product Color
 PU-IN 300  TS EN 1504-2:2005	Polyurethane based, two-component, low viscosity, closed-cell injection resin that swells by reacting with water.	PR. 5,1	25 kg + 2,5 kg Metal Bucket Set	24 pcs.	Yellowish
 PU-CLEAR  TS EN 1504-2:2005	Poliüretan esaslı, tek bileşenli, kullanıma hazır, UV dayanımlı, şeffaf, süper elastik son kat kaplama malzemesidir.	PR. 5,1	5 kg Metal Bucket Set	???	Transparent
 PU-CLEAR PR  TS EN 1504-2:2005	Poliüretan esaslı, tek bileşenli, kullanıma hazır, şeffaf astar.	PR. 1,3	1 kg Metal Bucket Set	???	Transparent

Thermal Insulation Materials

 HEAT 500 Y   TS 13566:2013	Cement-based, fiber-reinforced, polymer-added adhesive mortar for thermal insulation boards, developed for thermal insulation systems.	NA	25 kg Kraft Bag	60 pcs.	Grey
 HEAT 400 S   TS 13687:2019	Cement-based, polymer modified plastering mortar for thermal insulation boards, developed for thermal insulation systems.	NA	25 kg Kraft Bag	60 pcs.	Grey
 HEAT 200 D   TS 7847:2012	Cement-based, polymer and silicone added, 1.5 mm grain sized, textured decorative render.	E₅-S₄-W₁-V₁	25 kg Kraft Bag	60 pcs.	White
 HEAT 300 D   TS 7847:2012	Cement-based, polymer and silicone added, 2 mm grain sized, textured decorative render.	E₅-S₄-W₁-V₁	25 kg Kraft Bag	60 pcs.	White
 HEAT 400 C   TS 7847:2012	Cement-based, polymer and silicone added, line pattern textured decorative render.	E₅-S₄-W₁-V₁	25 kg Kraft Bag	60 pcs.	White

Masonry Mortar

Product Name	Product Description	Product Class	Package	QTY per Pallet	Product Color
 ADG 200  TS EN 998-2:2017	Cement-based, single-component, polymer-added, ready-to-use, gas concrete bonding mortar.	M10	25 kg Kraft Bag	60 pcs.	Grey
 PLASMAC M150  TS EN 998-1:2017	Cement-based, one-component, fiber added, machine or hand-applied, ready-made coarse plaster mortar.	CS IV	25 kg Kraft Bag	60 pcs.	Grey
 BB 100  TS EN 998-2:2017	Cement-based, single-component, polymer added, ready-to-use bonding mortar with increased adhesion strength, developed for masonry units.	M15	25 kg Kraft Bag	60 pcs.	Grey
 PLASMAC G300  TS EN 998-1:2017	Cement-based, single-component, polymer modified, mineral and fiber added, ready-made gas concrete plaster that provides adhesion and easy application.	CS IV	25 kg Kraft Bag	60 pcs.	Grey
 PLASMAC H100  TS EN 998-1:2017	Cement-based, single-component, polymer modified, mineral and fiber added, ready-made hand plaster that provides adhesion and easy application.	CS IV	25 kg Kraft Bag	60 pcs.	Grey

Historical Structure Restoration

Product Name	Product Description	Product Class	Package	QTY per Pallet	Product Color
 ANTIQUE HH 20  EN 998-2	Cement-free, natural hydraulic lime-based plastering material used to obtain a smooth surface in historical masonry buildings.	M10	20 kg Kraft Bag	60 pcs.	Beige
 ANTIQUE HH 50  EN 998-2	Cement-free, hydraulic lime-based, thixotropic repair mortar designed for historical buildings, containing harmless natural minerals and fibers.	M10	20 kg Kraft Bag	60 pcs.	Beige

Historical Structure Restoration

Product Name	Product Description	Product Class	Package	QTY per Pallet	Product Color
 ANTIQUE IN 200 CE EN 998-2	Injection mortar containing natural hydraulic lime and micronized carbonates, developed for historical masonry structures.	M5	20 kg Kraft Bag	60 pcs.	Beige
 ANTIQUE NHL 3,5 CE EN 998-2	Hydraulic lime used in the restoration of historical buildings and for binding purposes while producing khorasan mortar.	M5	18 kg Kraft Bag	60 pcs.	Beige

Concrete & Mortar Admixtures

Product Name	Product Description	Product Class	Package	QTY per Pallet	Product Color
 LATEX 5 CE EN 934-3	Acrylic dispersion based mortar admixture, used to increase adherence and impermeability in plasters and mortars	Chart 2	5 or 30 kg Plastic Drum	-	Beyaz
 WR CE EN 934-3	Capillary effect, crystalline water impermeability additive.	Chart 9	5 or 30 kg Plastic Drum	-	Brown
 CURE 201 CE EN 934-3	Paraffin emulsion based concrete curing material.	Chart 2	5 or 30 kg Plastic Drum	-	White
 CURE 301 CE EN 934-3	Acrylic emulsion based concrete curing material.	Chart 2	5 or 30 kg Plastic Drum	-	White
 MORTAR II CE EN 934-3	Mortar admixture that increases the workability and durability of the mortar by fluidizing it, providing impermeability and adherence to the applied surface.	Chart 2	5 or 30 kg Plastic Drum	-	White

Concrete Additives

Product Name	Product Description	Product Class	Package	QTY per Pallet	Product Color
 HYPER SDC 515 CE EN 934-2	Modified polymer-based super plasticizer concrete additive developed for the ready-mixed concrete industry, allowing concrete to gain fluidity.	Chart 3,1-3,2	30 kg Plastic Drum, IBC	-	Brown
 HYPER SDC 555 CE EN 934-2	Polymer-based super plasticizer concrete admixture that increases early and final strengths by reducing the mixed water of concrete at a high rate or gives high fluidity to concrete with the same amount of water.	Chart 11,1	30 kg Plastic Drum, IBC	-	Brown
 SUPER 100 CE EN 934-2	Naphthalene sulfonate based concrete additive that helps concrete gain fluidity, has a high water retention, set retarder.	Chart 3,1-3,2	30 kg Plastic Drum, IBC	-	Brown
 PC 400 CE EN 934-2	Polymer-based super plasticizer concrete additive developed for the precast and ready-mixed concrete industry, which enables concrete to gain fluidity.	Chart 7	30 kg Plastic Drum, IBC	-	Brown
 MR 09 PR CE EN 934-2	Modified lignin sulfonate based concrete additive that enables concrete to gain fluidity and increases its workability while reducing the water/cement ratio.	Chart 10	30 kg Plastic Drum, IBC	-	Brown
 AIR CE EN 934-2	Air-entraining concrete additive that enables concrete to gain resistance against the freeze-thaw cycle.	Chart 5	30 kg Plastic Drum, IBC	-	Brown
 ANTIFREEZE 412 CE EN 934-2	Set accelerator concrete additive that increases the early strength of concrete at low temperatures.	Chart 6	30 kg Plastic Drum, IBC	-	Brown
 RETARDER CE EN 934-2	Plasticizing concrete admixture that delays setting at a high rate.	Chart 8	30 kg Plastic Drum, IBC	-	Brown

Tunnel Contributions

Product Name	Product Description	Product Class	Package	QTY per Pallet	Product Color
 PROOF 100 CE EN 934-2	Cement-based, one-component, powder, crystallized concrete admixture that provides structural waterproofing by forming crystals within the concrete.	-	30 kg Plastic Drum, IBC	-	White
 AF 600 CE EN 934-5	Alkali-free, aluminum sulfate-based concrete chemical additive developed for wet and dry system sprayed concrete applications, with high setting accelerator properties and improving early strength.	Chart 2.2	30 kg Plastic Drum, IBC	-	Transparent
 AL 400 CE EN 934-5	Concrete chemical additive developed for wet system sprayed concrete applications, containing alkali, has high setting accelerating properties and improves early strength.	Chart 2.2	30 kg Plastic Drum, IBC	-	Transparent
 AFP 500 CE EN 934-5	Purpose of dry shotcrete applications is to accelerate the setting time of the mortar with it is an alkaline-free powder additive used.	Chart 2.2	20 kg Kraft Bag	60 Adet	White
 CUF 550 CE EN 1504-2	Sodium silicate based setting accelerator and anti-corrosion additive.	-	30 kg Plastic Drum, IBC	-	Transparent
 CSF 100 CE -	TBM is a clay separator, floor conditioner and polymer-containing foaming agent.	-	30 kg Plastic Drum, IBC	-	Transparent
 HRF 200 CE -	Ground conditioning foaming agent for hard rock tunnel boring machines.	-	30 kg Plastic Drum, IBC	-	Transparent
 HPF 300 CE -	Polymer-containing foaming agent developed to increase the foam performance of tunnel boring machines.	-	30 kg Plastic Drum, IBC	-	Transparent
